

DUAL CREDIT

Community college course delivered specifically for high school students in grades 11 or 12. Individual students must complete community college admission and meet admission criteria. A 28E agreement between the high school and the community college is required. Students may earn high school and community college credit. All students enrolling in dual credit courses must have either an ACT score or COMPASS score on file in Guidance. To take the COMPASS assessment, please make an appointment in the guidance office.

Special note for students with disabilities: There are some differences in disability law that students need to be aware of when taking concurrent classes either at their high school or community college or university.

- Students in concurrent classes must follow the laws applicable to the college since they are receiving college credit – whether or not the class is being taken at the high school or the college.
- Accommodations – not modifications – are allowed at the college level. Students will complete all assignments and tests just as the other students, but they will also receive appropriate college accommodations.
- If modifications are required for the student to succeed in the course, then concurrent enrollment is not an appropriate placement.

FINANCIAL ACCOUNTING

020731

GRADES: 11-12

*PREREQUISITE: ACCOUNTING I

.5 CREDIT/1 TERM

DUAL CREDIT - ACC-142 (3 college credits)

This course offers dual credit from both Bettendorf High School and Scott Community College. This course is designed for the serious accounting and /or business students. The course is designed to provide advanced knowledge and college credit in the area of financial accounting. This class will use accounting in the decision making process. Information will be presented with a bias toward user orientation as opposed to preparer orientation. Course competencies will be developed in the areas of identifying the role of accounting in society, basic accounting and business terminology, concepts behind financial information, accepted accounting practices, analysis and interpretation of financial statements of sole proprietorships and corporations.

Benchmarks

The students will:

- identify the major policy setting bodies in the accounting profession and demonstrate an understanding of their roles
- explain the role of accounting in making business decisions.
- describe the major types of business organizations in private enterprise economy and how accounting procedures differ for each type of business
- apply and interpret the accounting concepts and principles.
- identify and describe the generally accepted accounting principles and how they impact the recording of financial transactions and development of financial statements
- explain the role of certain ratios in the decision making process for businesses.
- identify and perform concepts related to Cash Control, and Receivables.
- identify, explain and report debt financing, equity financing and other liabilities.
- assess and interpret the financial condition of a business through financial ratios analyzing profitability, liquidity and solvency to make informed business decisions
- demonstrate understanding of planning and control principles used to evaluate the performance of a company
- develop a working knowledge of an annual report and financial statements and how they are utilized in the business environment

Iowa Core Curriculum/21st Century Skills - The accounting standards also focus on the skills and competencies students need to acquire and develop as they further their education, prepare to enter the workforce, and pursue their chosen career path.

Student will utilize:

- strategic and critical thinking
- risk analysis
- problem solving and decision making
- communication
- teamwork and leadership
- the ability to employ and use technology
- an awareness of the legal and regulatory environment
- ethical responsibility

*See the Business department introduction for a description of Employability, Financial Literacy and Technology essential skills and benchmarks

MANAGERIAL ACCOUNTING**020721****GRADES: 11-12*****PREREQUISITE: ACCOUNTING I & FINANCIAL ACCOUNTING****.5 CREDIT/1 TERM****DUAL CREDIT - ACC-146 (3 college credits)**

This course offers dual credit from both Bettendorf High School and Scott Community College. This course emphasizes financial statement analysis, including the reporting of cash flows and managerial accounting as it relates to decision-making and to the manufacturing environment. This course serves as a foundation for other accounting courses for students planning careers in accounting, as well as providing for the needs for students in business administration. This class is a continuation of Financial Accounting. This class covers the following topics: Managerial Accounting, Job Order Cost Accounting, Process Cost Accounting, Activity-Based Costing, Cost-Volume-Profit Analysis, Incremental Analysis, Variable Costing, Pricing, Budgetary Planning, Budgetary Control and Responsibility Accounting, Standard Costs and Balanced Scorecard, Planning for Capital Investments, Statement of Cash Flows and Financial Analysis. Emphasis is given to managerial and cost analysis activities by exposing students to accounting principles and practices. This course not only serves as the foundation for other accounting courses, but also provides the literacy needed for students in business administration.

Benchmarks

The students will:

- distinguish and use different cost methods used in making business decisions
- describe and illustrate the reporting of cash flows, including cash flows from operating activities, investing activities, financing activities and significant non-cash transactions
- describe basic financial statement analytical procedures including horizontal and vertical analysis
- identify and discuss the general content areas of corporate annual reports
- define managerial accounting and describe its role in the management process
- differentiate between managerial and financial accounting
- differentiate between general accounting systems and cost accounting systems
- use job order cost information for decision-making
- understand and use budgetary components in preparing financial, production, labor and cash budgets
- describe desired characteristics of effective managerial accounting reports
- describe and illustrate basic principles of budgetary systems
- describe the managerial accountant's role in the decision-making process
- explain the nature and importance of capital investment analysis

Iowa Core Curriculum/21st Century Skills addressed in this course:

- Employability Skills
- Financial Literacy

*See the Business department introduction for a description of Employability and Financial Literacy essential skills and benchmarks.

PERSONAL FINANCE**020631****GRADES: 10-12*****PREREQUISITE: NONE****.5 CREDIT/1 TERM****DUAL CREDIT - FIN-121 (3 college credits)**

Financial planning - your roadmap to financial success! With an emphasis on real-life situations and applications, students will use materials from the Family Economics and Financial Education, the JumpStart Coalition for Personal Financial Literacy, Practical Money Skills as well as online resources to focus on financial literacy, choices and decisions. - 2) Implement professional standards in food preparation.
- 3) General (Basic) culinary product knowledge

Skill based

- 1) Demonstrate skill in knife, tool and equipment handling.
- 2) Operate equipment safely and correctly
- 3) Apply principles of food handling and preparation

CHEF YOUTH APPRENTICESHIP**299811****GRADES: 11-12*****PREREQUISITE: FOOD & NUTRITION, SANITATION & SAFETY****1 CREDIT/2 TERM****DUAL CREDIT – HCM-501 (2 College Credits)****Family & Consumer Science****Location: Scott Community College and students need to provide their own transportation.**

Students will receive information and competencies in applicable food service fields, be involved in job placement, and learn American Culinary Federation apprentice work processes. This will be an 18 week course offered during the spring semester. Class will be held each Monday with students expected to be on their job site Tuesday through Friday. Employment is mandatory at an approved culinary arts site.

Verification of a minimum of 16 hours each week is required to receive full credit for this course. Students enrolled in this course will receive articulated credit and practical experience in American Culinary Federation approved work processes.

Benchmarks

The students will:

- gain knowledge of regulations, skills, and standards required in the food service industry.
- acquire a solid work-based foundation in culinary arts.
- gain an understanding of the production issues related to the food service industry.
- increase their employability in the food service, hospitality, and travel industries.

SANITATION & SAFETY**291211****GRADES: 11-12*****PREREQUISITE: FOOD & NUTRITION****1 CREDIT/2 TERM****DUAL CREDIT – HCM-100 (2 College Credits)****Family & Consumer Science****Location: Scott Community College and students need to provide their own transportation.**

This course provides a solid foundation in food service sanitation and safety. Upon completion of this course, the student will be provided the opportunity to take the National Restaurant Association exam for certification. After completion of this course, the student will be able to: gain an understanding of the health and safety issues related to the industry, meet the state standards for sanitation and safety in the food service industry and increase his/her employability in the food service industry. This course is the introductory course in the Chefs Apprenticeship Program. It will be an 18 week course meeting every other day during the fall semester. On the off days of class, the student will be assigned to a study hall. Students enrolled in this course will receive articulated credit and practical experience in American Culinary Federation approved work processes.

Benchmarks

The students will:

- gain an understanding of the health and safety issues related to the food service industry.
- meet the state standards for sanitation and safety in the food service industry.
- increase their employability in the food service industry.

HOSPITALITY ACADEMY**294211****GRADE: 12*****PREREQUISITE: LETTER OF APPLICATION****1 CREDIT/2 TERMS****DUAL CREDIT - HCM-319/HCM957/BUS908 (6 College Credits)****General elective****Class is taught off sight and students need to provide their own transportation.**

This course is a beginning level course to the Hospitality Management Program at Scott Community College. Students who have taken the Safety and Sanitation Course are eligible to apply for acceptance into this academy. The academy will allow students to experience many aspects of the hospitality field in an effort to explore this as a future career option. Students will be given an introductory look at the hospitality field, will be provided hands-on activities in a laboratory setting and will be placed in a business setting one day per week. The class will be held at Scott Community College in the new, state-of-the-art Culinary Arts and Hospitality Management Center.

Benchmarks

The students will:

- analyze operational problems and establish procedures
- assign duties to other employees
- collaborate on menu planning/serving arrangements
- perform serving duties
- manage finances
- control inventories; develop budgets, policies and procedures
- purchase supplies and equipment
- record production and operational data
- carry out customer service
- train workers in food preparation, sanitation, and safety

EDUCATION ACADEMY**253411****GRADES: 12*****PREREQUISITE: LETTER OF APPLICATION****1 CREDIT/2 TERM****DUAL CREDIT General Elective****Class is taught off sight and students need to provide their own transportation.**

This course provides 18 weeks of studying the structure of American education while also providing background information about the role of a teacher. Emphasis will be placed on providing a broad foundation to assist students with making career choices. The first 9 weeks of this class will take place in a typical classroom setting. During the second 9 weeks of the class, opportunities for guided observation and teacher aide services in various school classrooms will be provided. Bettendorf and Pleasant Valley school districts will support learning opportunities at the elementary and middle/Jr. High level. Students will be partnered with a mentoring teacher for four weeks at one level, and five weeks at another. One day per week will be used for reflection and planning. This will be conducted by an adjunct instructor from Scott Community College.

Benchmarks

The students will:

- decide whether or not to enter the field of education.

- decide what age group they are interested in teaching.
- understand the complex role of a teacher in today's classroom.
- understand the methods and theories of education.
- understand the standard of education to complete an education program.
- differentiate between the pros and cons of being a teacher.

CHILD HEALTH, SAFETY & NUTRITION
***PREREQUISITE: CHILD DEVELOPMENT**
DUAL CREDIT – ECE-133 (3 College Credits)

050521

GRADES: 11-12
.5 CREDIT/1 TERM
General Elective

This course offers a basic understanding of the current concepts in the fields of health, safety and nutrition for young children. These fields and their interrelationships are applied to optimize the physical and cognitive development of the young child.

Benchmarks

The student will:

- Demonstrate the skills necessary to the establishment and maintenance of a quality child care program that address health, safety and nutritional conditions.
- promote preventive health care, prevent and treat injuries, and understand and promote the benefits of a well-nourished child.
- apply and interrelate the principles of health, safety and nutrition in early childhood.

EARLY CHILDHOOD GUIDANCE
***PREREQUISITE: CHILD DEVELOPMENT**
DUAL CREDIT – ECE-243 (3 College Credits)

050531

GRADES: 11-12
.5 CREDIT/1 TERM
General Elective

Effective methods used to guide children's behavior in individual and group situations are the emphasis of this course. Positive aspects of discipline and development of self-control in children are stressed.

Benchmarks

The student will:

- demonstrate effective child guidance communication.
- demonstrate how to strengthen existing behavior.
- demonstrate how to develop and maintain new behavior.
- utilize effective guidance techniques when eliminating inappropriate behavior.
- utilize skills necessary to modify emotional behavior.
- plan, implement, and evaluate a behavioral management project.
- identify and be able to proceed with the process of mandatory reporting of child abuse and neglect.
- compile, analyze, and evaluate data related to child development issues.
- demonstrate flexibility, positive teamwork, and leadership skills within the classroom
- apply consistent ethical and social behavior and demonstrate self-direction and initiative
- demonstrate written and oral presentation skills Identify career paths within the area of child development.
- use digital tools in the creation of projects.

TRANSPORTATION ACADEMY
***PREREQUISITE: AUTO MAINTENANCE, POWER MECHANICS,**
AND ADMINISTRATIVE APPROVAL
DUAL CREDIT – AUT-115/AUT-103/DSL-103/CRR-103 (5.5 College Credits)

099901/099903

GRADE: 12
2 CREDITS/4 TERMS

**Class is taught off sight and students need to provide their own transportation.

Transportation Academy is a course designed to prepare students to enter the world of work in automotive repair. This course will be taught at Scott Community College and will run for thirty-two consecutive weeks. The course will be divided into the following units:

- Basic Core Skills (3 weeks) - This module of the course is designed to acquaint the student with the proper personal and shop procedures needed to function in a repair shop.
- Diesel Power Equipment (9 weeks) - This module of the course is designed to acquaint the student with modern diesel powered equipment operation and service.
- Automotive Technology (9 weeks) - This module of the course is designed to acquaint the student with basic maintenance and service.
- Automotive Collision Repair (9 weeks) - This module will be divided into four segments and will include instruction in each of the following areas: Detailing and Trim service, Metal Finishing, Panel Alignment, and Basic Refinishing.

The students enrolled in this course will participate in job shadowing in addition to participating in the modules listed above. One day a week the student will visit a repair facility to observe the typical duties and responsibilities of individuals employed in the various areas covered by the course modules. The School-To-Work Coordinator will coordinate and supervise this activity.

WELDING TECHNOLOGY II

241421

GRADES: 9-12

***PREREQUISITE: WELDING TECHNOLOGY I WITH "C" OR BETTER**

.5 CREDIT/1 TERM

DUAL CREDIT – WEL-126/WEL-129 (9 College Credits)

Industrial Technology

Welding Technology II is designed to provide the fundamental skills of welding. AC and DC electric arc welding and MIG Welding skills will build upon those learned in welding I. Emphasis on out of position welds in SMAW and MIG. MIG short circuit transfer and spray arc will also be covered. This class is recommended for junior and senior students entering the Industrial Technology curriculum leading to career employment and/or Engineering/Architectural careers. Students earning a grade below a "C" in Welding Technology I must have instructor approval to sign up for this class.

Benchmarks

The students will:

- identify career opportunities in the fields of metal fabrication and welding.
- define and safely use the basic hand tools, power equipment, and welding equipment.
- learn, identify, and use A.W.S. welding symbols.
- identify and understand welding symbols used on basic production drawings.
- set up and operate gas/electric arc welding equipment and perform competencies in each area.
- practice problem solving techniques to improve success in various competencies.
- practice the key components of industrial work ethic.
- identify various metals and their weldability.
- learn and practice the four welding positions.
- learn about Unions, piece work, and welding certification.
- develop a higher skill level in MIG and TIG welding.
- develop knowledge of various filler materials.
- develop blueprint reading skills.

PROGRAMMING IN C++

032511

GRADES: 11-12

***PREREQUISITE: GEOMETRY OR HONORS GEOMETRY**

.5 CREDIT/1 TERM

DUAL CREDIT – CIS-161 (3 College Credits)

**Class is taught off sight and students need to provide their own transportation.

The students will learn how to read, write, and revise computer programs using the programming language C++. Students will earn dual high school and community college credit.

Benchmarks

The students will:

- write well-structured programs in the C++ programming language, planning input and output and using iterative loops and conditional statements where appropriate.
- break large programming problems into smaller pieces using Procedures and Functions and use parameters to send values between these subprograms.

PROGRAMMING IN JAVA

032611

GRADES: 11-12

***PREREQUISITE: PROGRAMMING IN C++**

.5 CREDIT/1 TERM

DUAL CREDIT – CIS-171 (3 College Credits)

Mathematics

**Class is taught off sight and students need to provide their own transportation.

The students will learn how to read, write, and revise computer programs using the programming language Java. Students will earn dual high school and community college credit.

Benchmarks

The students will:

- write well-structured programs in the Java programming language, planning input and output and using iterative loops and conditional statements where appropriate.

- break large programming problems into smaller pieces or subprograms.
- document programs and subprograms.
- read programs or subprograms and determine what they do.
- revise previously written programs to alter their function.

ENGINEERING ACADEMY

160811

GRADE: 12

1 CREDIT/2 TERMS

General Elective

***PREREQUISITE: APPLICATION/ENGINEERING PROBLEMS**

DUAL CREDIT – ERG-107 (6 College Credits)

Class is taught off site and students need to provide their own transportation.

This course will help students understand the field of engineering and engineering technology. By exploring various technology systems and manufacturing processes, students will learn how engineers and technicians use math, science and technology in an engineering problem solving process to benefit people. This class will contain nine weeks of coursework and nine weeks application of their knowledge at one or more Deere and Company facilities.

Benchmarks

The students will:

- understand major concepts of different fields of engineering
- develop problem solving skills and strategies
- identify components of total quality management
- utilize computer technology through CAD/CAM programs and apply them in a work environment
- perform field research by analyzing data
- understand trends, issues and challenges of the engineering field
- identify potential careers in the field of engineering

LOGISTICS ACADEMY

162411

GRADE: 12

1 CREDIT/2 TERMS

General Elective

***PREREQUISITE: NONE**

DUAL CREDIT – MGT-260 (3 College Credits)

Class is taught off site and students need to provide their own transportation.

The course will provide an overview of the role of Logistics in today's business world; terminology in the field of logistics and an overview of the major functional areas of the Logistics field such as transportation, inventory management, distribution and warehousing, regulatory and compliance. Students will be exposed to trends, issues and challenges of the field, as well as to potential careers in Logistics. Students will spend nine weeks in a classroom setting and nine weeks in a business setting specifically working in a logistics setting.

Benchmarks

The students will:

- understand major concepts of logistics and its terminology
- recognize the elements of a logistics system and the major functional areas of logistics
- recognize the support of areas for logistics business and their impact in the success of the logistics operation
- understand trends, issues and challenges of the logistics field
- expand knowledge of logistics (supply chain) operations in their area and in their everyday life
- identify potential careers in the field of logistics
